

ADITYA CHATURVEDI

Payments & Fintech | Integration, Solutions & Technical Operations

+91 7999364398 | adityachaturvedi2906@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Payments and fintech professional with 3+ years across merchant onboarding, API integration, and technical operations. Experience with payment gateway integrations, webhooks, server-to-server APIs, hosted checkout, and platform plugins, plus a frontend background in React, Angular, and Next.js. Onboarded 100+ merchants and built an internal self-serve onboarding tool adopted by the team. Comfortable working across merchants, product, and engineering teams.

WORK EXPERIENCE

SDE 2 — Integration Support Engineer – Easebuzz | Aug 2025 – Present

- Onboarded 100+ merchants across webhooks, server-to-server APIs, hosted checkout, and plugins.
- Scope integration requirements and recommend the best-fit integration path per merchant.
- Run product walkthroughs and training to take new merchant accounts live.
- Built Arcade, a self-serve onboarding tool that cut walkthrough calls from ~5 to ~3 a day.
- Primary liaison between merchant partners and engineering teams.

Frontend Developer – Moneytor | Aug 2024 – Aug 2025

- Revamped the internal CRM used by support teams for collections across IVR, SMS, and email workflows.
- Developed CRM features that reduced repetitive manual processes for end users.
- Configured and maintained payment gateway integration in coordination with the vendor.

Frontend Developer – Intelisync | Sep 2023 – Jul 2024

- Developed an internal admin dashboard that improved operational efficiency for the team.
- Led frontend delivery for a recruitment-focused product in coordination with backend teams.
- Built reusable UI components for forms, calendars, and multi-user views using Angular.

Frontend Developer (Internship) – Inferyx | Feb 2023 – Aug 2023

- Built client-facing UI projects with a focus on responsive delivery.
- Implemented a validation system that reduced data entry errors in dashboard tables.

PROJECTS

Arcade — Internal Merchant Onboarding Tool (Easebuzz)

- New merchants abandoned setup midway; documentation was dense and spread across sources.
- Built an API playground where merchants run through payment flows against mocked responses.
- Each step surfaces the relevant endpoint, payload, and doc reference inline, so merchants learn the flow while using it.
- Lets merchants understand integration end-to-end before writing code or touching credentials.
- Validated with 5–6 merchants and adopted internally; replaced 20–30 minute walkthrough calls.
- Cut my own merchant walkthrough calls from ~5 to ~3 a day, freeing roughly 4 hours a week.
- Phase 2 in progress: extending the playground to live sandbox API calls.

SKILLS

Domain: Payments & Fintech, Webhooks, Server-to-Server APIs, Hosted Checkout, Plugins

Solutioning: Merchant Onboarding, Go-Live Management, Solution Design, Requirements Gathering, Stakeholder Management, Client Support

Technical: REST APIs, Postman, SQL, JavaScript, TypeScript, React.js, Angular, Next.js, Node.js, Express.js, HTML, CSS, Tailwind CSS, AWS

Databases: MySQL, SQL Server, MongoDB, PostgreSQL

Tools: Jira, Confluence, Git, GitHub, Postman, Docker (basic)

EDUCATION

Indira Gandhi National Tribal University, Amarkantak (M.P.) | 2019 – 2022

Bachelor of Vocational Studies in Software Development | GPA: 8.2
